I' is an unwelcome duty we are called upon to perform this week. We must chroulds the melancholy news that the flepublicans have earried Oblo by an jurreased majority. and have wrested Indiana also from carry Ohio, but the result in Indiana ls a bitter disappolulment. It is alue to a multiplicity of causes. In the first place Landers was a weak candidate and ot course weakened the whole ticket. But this is not the main reason. The Republicans in their efforts to carry the State realized that with them it was n death struggle, without Indiana their cause was bonciess, without It the Democrats could still have an even chance to elect their man. There is no doubt that fraudulem voters were imported but while this affected the result to some extent, the principal reason was the money the liepublicans bad to the Freedom of Speech, the Natural put into the campaign. Money will buy anything. The Republicans it is believed, and with a considerable show of reason, bought up the Greenback leaders, including Wesver himseif. This helped them a great deal and the nalimited supply of money they had at their command to use in buying votes on the day of the election was more than the Democrats could overcome. There is always a Hoosler Governor over there, boys? class of tramps and vagabonds who don't care the snap of a finger for the result of any election and these votes can always be bought. The Republicans having more money of course The Eminence Constitutionalist has could get these votes, and so the title was turned in the State of Indiana. This is about the best explanation we can give for the fietent. It is n severe blow and It is no use to try to con-

They have the prestige of victory in the October States, but the Democrats cau see wherein they have erred and profit by their severe lesson and take off their roats and walk in for the fight next month.
